

Professional Roofing Estimator Certificate (PREC)

Cotney Consulting Group is offering a professional certificate to provide industry-wide recognition for roofing estimators as a first step to certification for candidates with less than 5-years estimating experience. This certificate program was developed in conjunction with subject matter from professional experts whose primary role is to oversee and manage all aspects of estimating a roofing project. This multi-step process recognizes the estimating proficiency and provides the candidate with industry and peer recognition with a Professional Roofing Estimator Certificate.

Professional Certificate Program Outline

Estimating Proficiency Test

- The purpose of the proficiency test is to find out whether you already have the knowledge and the skills that are taught in CCG estimating training. If you receive a passing grade on the proficiency test, you will earn credit for this course and you are prepared to proceed onto the next steps in the certificate process.
 - If you do not receive a passing grade, you will be required to take the CCG estimating course training and retake the test.

Estimate Submission

- Candidate will be required to submit a full take off, cost estimate and estimate summary for both low slope and steep slope roof design types.
 - All drawings, specifications and instructions will be supplied to candidates.

Issuance of Professional Roofing Estimator Competency Certificate

- Once Candidate has successfully passed the proficiency test and received a passing grade on both low and steep slope estimating exercises the Roofing Estimator Professional Certificate (PREC) will be issued to the candidate.
