

Roofing Project Management Certification Program

In this self-paced online course, we will prepare you for a professional role in the management of roofing construction projects by giving you the knowledge to understand the necessary organizational and strategic requirements.

Project Managers are responsible for planning and controlling every stage (from pre-construction to completion) of roofing installations for multiple concurrent construction projects. Those projects need to be completed on time and within budget while ensuring that roofing teams work in safe conditions. Project Managers play a pivotal role in the success of their company.

This certification is intended for those interested in advancing their career and managerial role in the roofing industry.

This certification was also designed for Roofing Companies to train their candidates for the Project Manager position. They will gain the knowledge and fundamentals for overall success.
