

# ROOFING SUPERINTENDENT CERTIFICATION

## Program Syllabus

### Introduction:

In this self-paced course, we prepare you for a professional role in the management of roofing construction projects by understanding the requirements necessary for the successful management of projects superintendents. Superintendents are responsible for overseeing roofing installation for compliance with plans, specifications, safety, quality, and schedule and supervise roofing personnel: planning, scheduling, organizing, and directing work for multiple crews. They play a pivotal role in the success of their company.

This course is intended for those interested in advancing their career and managerial role in the roofing industry.

This course was also designed for Roofing Companies to train their candidates for the Superintendent position. They will gain the knowledge and fundamentals for overall success.
